

NO MORE COLLAPSED STACKS

Just place one STAY-RITE™ stacking device on each corner of an open-top box.

- ✓ Strong
- ✓ Reusable
- ✓ Economical

⊘ before

✓ with STAY-RITE

STAY-RITE™ corner boards have significant load-bearing capability with the capacity of supporting multiple containers and several thousand pounds of static load.

No stacking device, regardless of how advanced, can: overcome the laws of physics; correct careless/inadvisable loading, stacking or shipping practices; or allow the use/reuse of damaged stacking components. Performance is limited not only by this device, but by the weight, strength, and condition of the other objects in, or supporting, a stack. Please always use common sense and follow the rule, "When in doubt, don't."
